

## **FLOODWATERS HAVE REACHED OUR NECK OF THE WOODS!**

*The Javari and Amazon Rivers are flooded and overflowing into our little city and surrounding areas! Suspended walkways and floors are being constructed all over town.*

*Here is a church congregation downtown. We made the suggestion of holding a pool party for the children's department. ☺ (Not really, it's gutter water.)*

*This is Pr. Edgard and Corina's home in Islândia, Peru, a nearby river village. This is NOT a floating house and is now currently flooding inside. In dry season it sits around five meters above ground.*

*Their church is flooded also and as in most homes and businesses, they make a second suspended wooden floor so church can go on as usual!*

**Please pray for those who are dealing with floodwaters in their homes, businesses and neighborhoods!**
